

## **OZONE DESTRUCTOR TYPE DOT**

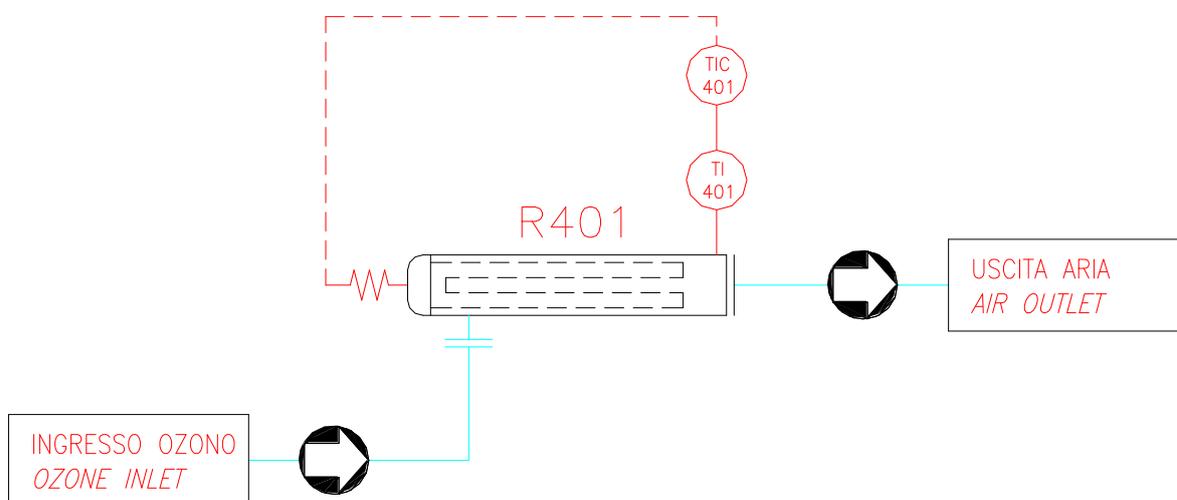

*The gas leaving the ozone contact system will be freed from any possible remaining traces of ozone in the vent ozone destruction plant. The destruction of ozone is based upon the principle of thermic decomposition.*

*As the reaction only proceeds optimally above a minimum temperature, heating of the gas is necessary with an heat exchanger.*

*The plant consist of following parts:*

- *gas heather*
- *reactor*
- *controls.*

Type	Flow	Installed power (KW)	Absorbed power (KW)	Dimensions
DOT 1	1	1,5	0,2	400 x 200 x 600
